SAINT-GOBAIN DESIGN

Our experience guarantees  
YOU PRIVACY AND CONFIDENCE

## WE ARE THE LEADERS of PRIVA-LITE® GLASS PARTITIONS SYSTEMS

Therefore we recommend the application of the whole PRIVA-LITE® Sliding System, not only the glass but also the integrated components that are ready to install easily. We offer the entire solutions for the offices, private spaces or hotels installed either as separate solution or together with the glass partition. It is compatible with the PRIVA-LITE® product family: CLASSIC, XL or COLOR.

PRIVA-LITE® Sliding System is a manually handled system of sliding doors combined with PRIVA-LITE®, the glass changing from opacity to transparency with the flick of a switch.

PRIVA-LITE® Sliding System is ideal for apartment and office rooms with an exclusive use for indoor applications. The system enables PRIVA-LITE® glass to slide in a synchronous manner, with one or two panels moving independently. Sliding door panels are hung at the top using a pair of clamps. The complete system is hidden by a cover, offering a more attractive finish.

## BENEFITS

of PRIVA-LITE® Sliding System:

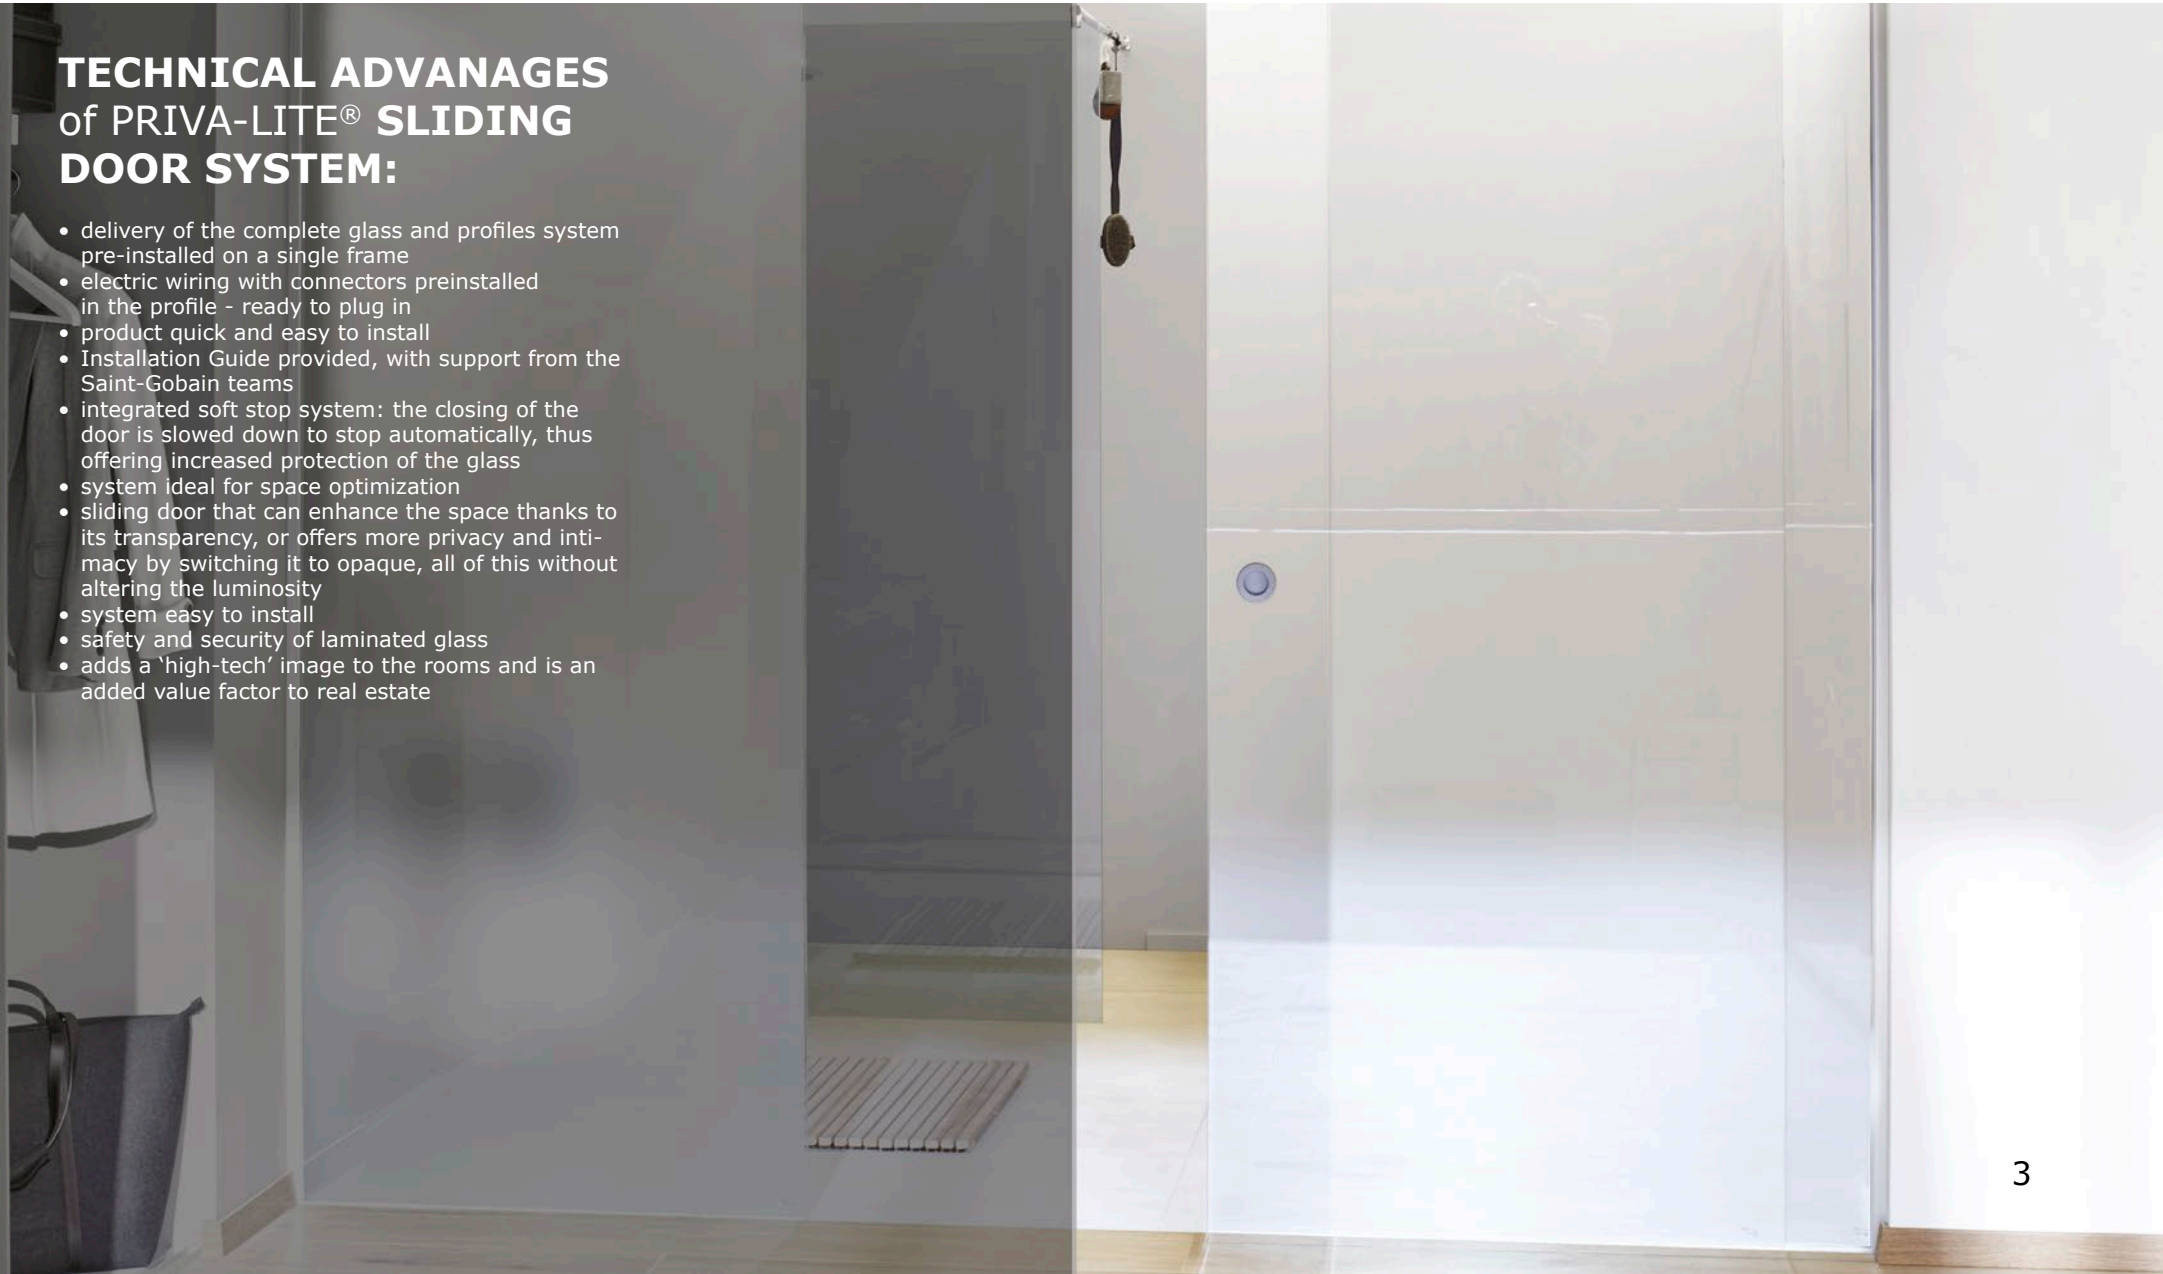

- modern look and 'wow effect'
- whole system in one package
- maximization of light transmission
- reduction of artificial light costs
- people efficiency
- privacy and discretion guaranteed
- freedom of space arrangement

Our experience guarantees  
YOU PRIVACY AND CONFIDENCE

## TECHNICAL ADVANAGES of PRIVA-LITE® SLIDING DOOR SYSTEM:

- delivery of the complete glass and profiles system pre-installed on a single frame
- electric wiring with connectors preinstalled in the profile - ready to plug in
- product quick and easy to install
- Installation Guide provided, with support from the Saint-Gobain teams
- integrated soft stop system: the closing of the door is slowed down to stop automatically, thus offering increased protection of the glass
- system ideal for space optimization
- sliding door that can enhance the space thanks to its transparency, or offers more privacy and intimacy by switching it to opaque, all of this without altering the luminosity
- system easy to install
- safety and security of laminated glass
- adds a 'high-tech' image to the rooms and is an added value factor to real estate

Our experience guarantees  
YOU PRIVACY AND CONFIDENCE

## TECHNICAL SPECIFICATION

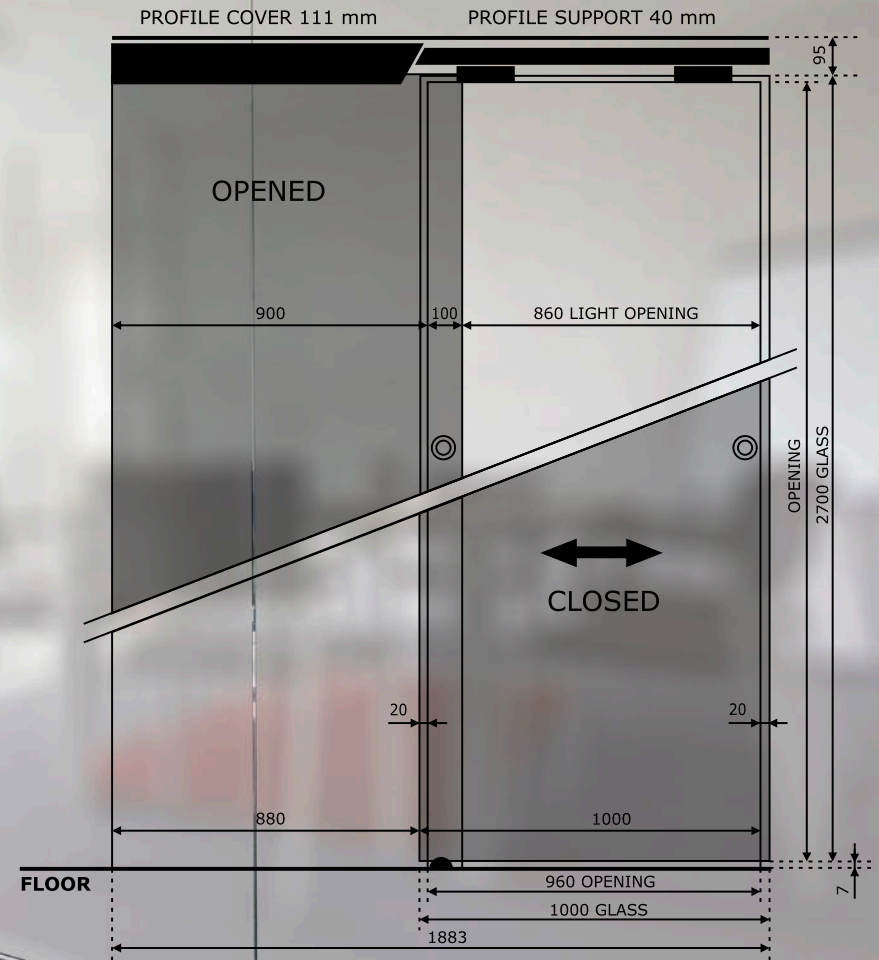

PRIVA-LITE SLIDING DOORS system can be applied either in wall or ceiling installations being part of office or private rooms partition elements. PRIVA-LITE glass must be always tempered with thickness of 12mm. Door leaf weight cannot cross 80kg. SoftStop system applied to each door provides comfort and silence when closed or opened. Width of the door leaf from 900mm.

System is designated for Priva-lite glass as laminated composition only. No DGU thickness is possible hence it cannot be used for external and balcony doors.
